Dip soldering system

Tinning wires safely

CT-SA Solder Pot Cartridge Stand

Robust and **stable** unit which is safe while working and avoids tipping over accidentally

It can be employed with T245 and T470 handles with Solder Pot Cartridges

Solder Pot Cartridges

These models are ideal for tinning wires and components faster and safer.

These cartridges can also be used to desolder Through Hole Multipin components.

Ref. **C245-SP01**

For T245 handles

Can be connected to DDE and DME stations with the AD-SD stand or the CHB-A converter.

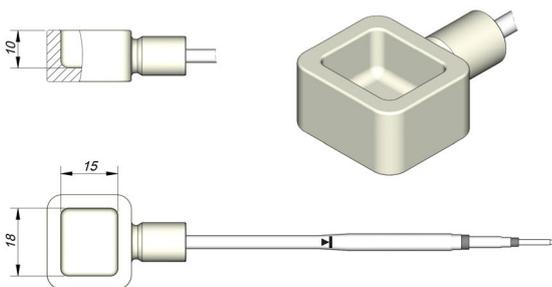

Ref. **C470-SP01**

For T470 handles.

Can be connected to HDE stations with the HD-SD stand or the CHB-A converter.

The long-lasting titanium pot will resist the corrosiveness of lead free solder alloys.

Dimensions: 15 x 18 x 10 mm

* With CD stations, the handle is directly connected to the control unit.
